

Fons Bingen

Design & production techniques, -processes & -organization, engineering functional management, general- & project management, QA, supply chain/ subcontracting, aerospace general, technology development.

Fons studied Aeronautical Engineering at the TU Delft and holds a Master degree in airframe design. He occupied various positions with program management and functional management responsibilities in various Fokker companies (before and after the bankruptcy). His key capability is adding structure to existing processes, control, organization and information within a given strategic context.

The NAG supports its members and start-ups through the development of expertise, advocacy, access to the national and international markets, and an extensive network. The Independent Experts Program offers this expertise of recent retired experts, employed by one of the members and who is committed to the values of the NAG: to obtain a better market position by sharing knowledge and working together.
