

ELECTRIC FLYING CONNECTION

**An introduction to
Electric Flying Connection**

**Gerben Groothuis
Board Member EFC**

The Team

We are a collective, connected by a common interest and and a strong believe in the same purpose.

Our primary function is to make relevant and meaningful connections.

Secondarily: Make aviation sustainable

Total LinkedIn Members: 1234

Total Active Members: 26

ELECTRIC
FLYING
CONNECTION

National charging network

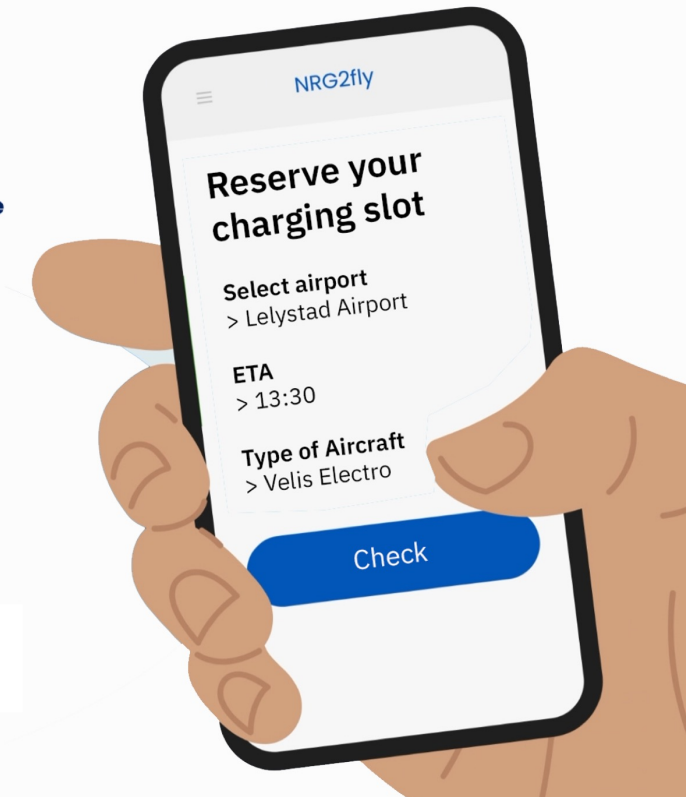

- ▶ The easier charging becomes, the more electric flying there will be
- ▶ The Netherlands is an ideal country for a nationwide charging network
- ▶ Goal: a network of five airports in 2025

Teuge Airport

Lelystad Airport (signing = concept)

A Nationwide Charging Network

1. Charging current E-Planes

2. Charging E-planes in development

3. Charging Ground Service Equipment

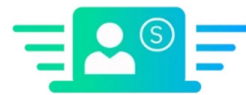

**ELECTRIC
FLYING
CONNECTION**

Join the electric flying revolution! 2 Membership options to choose from

We are working hard on a new organization and processes. As a starting organization, we fully depend on membership fees for funding. Therefore we hope that most applicants become full members to support us in setting up a professional organization and provide the necessary services for our members.

START-UP MEMBER €500

Electric flying is a new industry with start-up companies with limited funding. For these companies we created the Start-up membership with a lower fee and some limitations:

- Voting rights at the general assembly meeting
- No Board Position
- Entry fee €250,- (for applications until the 1st of April 2023 we do not charge this fee)

FULL MEMBER €1500

This is the regular membership for established companies that exist longer than two years with the following benefits.

- Eligible for Board Position
Voting rights at the general assembly meeting
- Entry fee €750 (for applications until the 1st of April 2023 we do not charge this fee)

ELECTRIC FLYING CONNECTION

Welcoming you as EFC's
newest member would
be a great honor!
